

Barron Lighting Group announces the release of its newest product offering - The Black Box Control System from Growlite®.

Glendale, AZ – January 15, 2019 – The **Black Box Control System** from **Growlite** by **Barron Lighting Group** is the horticultural industry's first large-scale reliable lighting controller coupled with environmental monitoring and complete data logging. The **Black Box** can control your entire grow site from lighting and HVAC to fertigation and security, please consult **Barron** customer service for specific functionality release dates. With the **Black Box** all information can be input via a convenient touch screen and can be accessed anywhere, at any time.

"The **Black Box** is the controls solution for commercial grows. This innovative system contains 16 individually controlled rooms/zones with the capability to control up to 3,072 fixtures or lamp circuits. Industrial grade environmental sensors accurately measure ambient temperature, relative humidity, CO₂ and Vapor Pressure Deficit. With the **Black Box**, grow sites are able to monitor grows, collect data between grows, and access information anywhere through Siemens' adaptive portal," said Alan Tracy, President of **Barron Lighting Group**.

Growlite's proprietary, in-house designs are UL Listed. **Growlite** publishes all IES files and third-party performance data so that you can be confident in the knowledge that **Growlite** products not only outperform others in the marketplace but that these products are safe as well.

With over 20 years of experience, and four years spent evaluating and designing lighting systems for horticulture facilities, the **Growlite** team offers unparalleled support with best-in-class customer service, while assisting you with lighting recommendations for your grow site.

Available today, the **Black Box Control System** from **Growlite** by **Barron Lighting Group** - the controller solution for your entire horticultural site.
