

FUSION OPTIX COMPLETES MAJOR FACILITIES & CAPACITY EXPANSION

Leading USA-based manufacturer of optical components and LED light engines for high performance lighting applications continues growth.

Woburn, MA – November 13, 2018 – Fusion Optix, Inc. (www.fusionoptix.com) announced today that it has completed another round of expansion as it continues on an upwards growth trajectory. The company has added 8,000 sq.ft. of manufacturing space and installed several new pieces of production equipment. The expansion also includes increased profile extrusion and LED engine capacity, continuous roll-to-roll film coating processes, improved quality lab and fixture testing capabilities. The company has also revamped its reception and office area, and improved company kitchen and rest facilities for its employees.

Dr. Terence Yeo, Fusion Optix's Founder and CEO comments, "Fusion Optix continues to invest a high percentage of our profits back into the business and our people. We continue to support our customer's demands for faster delivery and increased scale whilst increasing our capabilities for innovation. We are also supporting and backing our team. Our pay and benefits packages were already aimed at attracting the brightest and best talent in our industry. It was therefore very important for us to upgrade all aspects of the in-house experience for our loyal and committed employees."

In addition; Dr. Yeo adds, "Fusion Optix is the only company in the United States that possesses both advanced optical component and LED light engine production capacity in-house. The lighting industry remains very competitive and fast moving and our unique platform of proprietary and patented innovations backed up by in-house manufacturing is proving to be a very compelling value proposition for our customers. We will strive to continue to increase our capabilities and to continue to offer innovations that deliver real improvements in performance, delivery and cost down. We are committed to those objectives."

About Fusion Optix

Fusion Optix is the only company serving the lighting industry that possesses both advanced optical component and LED light engine production capacity in-house. Fusion Optix is recognized as one of the fastest growing companies in the USA and has ranked on the Deloitte Fast500 Technology, Inc5000, and Red Herring Top100. The company has a record of accomplishments as a leading, and trusted, supplier of enabling components and technologies for LED lighting applications. Our

customers include some of the world's most recognizable brands and we are inside products used every day in business, industry and the home, as well as demanding scientific, medical, military and aerospace applications. We are a privately held company founded in 2003. Our manufacturing facilities and company headquarters are in Woburn MA.
