

The Hidden Beauty of OS4: Open Square Linear LED

Innovative Commercial and Architectural Lighting

[RLE Industries](#), trusted architectural, commercial and industrial lighting manufacturer released the Lumenera [OS4: Open Square Linear LED](#) fixture. The robust open square design uses parallel rows of LED boards to illuminate the highly reflective interior. Its LED drivers are mounted in the center of the housing 2” in from the sides, hiding the drivers with little to no visibility from the floor. The hidden drivers and reflective interior combine to create a smooth and elegant indirect/direct lighting source. OS4: Open Square Linear LED fixture is designed to give architectural projects and commercial spaces even more creative freedom without sacrificing functionality.

“OS4 [Open Square Linear LED] and its unique ability to hide the LED drivers make it a perfect fixture for a number of different applications. Architectural, commercial, industrial, retail, this capable fixture is extremely versatile.” Gerald Coppola Sr., VP of Sales at RLE Industries said. “Using Philips LED boards, customers have multiple color temperature options and its drivers are dimmable down to 1%. OS4 is aesthetically-pleasing, reliable, and offers architects and designers an innovative lighting fixture for a number of different use cases.”

RLE Industries and its operating division, [Lumenera](#) continues to push the boundaries of design and function. With over 75 years of experience in the lighting sector, RLE offers customers the latest in commercial, architectural, and industrial lighting solutions.

About RLE Industries: With over 75 years of experience in the professional lighting industry. Knowledgeable professionals bring their decades of experience to design and develop durable, high quality lighting fixtures to meet customer needs. RLE can offer models for commercial, architectural and miscellaneous applications, as well as customizing standard products for short and medium runs that meet any reasonable request. Products proudly manufactured in the USA. RLE Industries is the newest division added to the Vcom IMC family of companies.

About Lumenera: An operating division of RLE Industries, Lumenera Lighting is a linear architectural LED line of products. Lumenera products use the most reputable names in LED board and driver technology, using our preferred Philips Lighting systems and components to deliver reliability smooth light in well-designed, built to last fixture housings.
