FOR IMMEDIATE RELEASE

PINNACLE ARCHITECTURAL LIGHTING ANNOUNCES PARTICIPATION IN LEDUCATION 2019

DENVER, February 12, 2019 - Pinnacle Architectural Lighting, a leading manufacturer of architectural lighting fixtures, announced today that it will exhibit in LEDucation 2019, the industry's leading LED-only tradeshow and educational forum in the United States. The company will occupy Booth #GB 820.

"LEDucation is an event that everyone in the lighting industry looks forward to every year," said Cameron Cole, president of Pinnacle Architectural Lighting. "Pinnacle has participated in this show for the past 6 years, and each year the opportunities to connect with specifiers and showcase our products multiply."

New products including COVE, LINERO and QiVi will be on display at the booth so attendees can have hands-on interactions with products.

COVE is Pinnacle's updated and perfected answer to indirect lighting. It allows for a soft, practical LED light to project in to the space without any glare from the hidden source.

LINERO combines slim housing profiles with functional distribution options. The slender architectural form ensures consistent, even radiance on every surface.

QiVi makes a statement in any architectural space. The versatility of this geometric fixture allows for unique applications that are further amplified with any other fixture in the Pinnacle Architectural Lighting catalog.

Only seeing these new products up close and in person can give you an appreciation for the quality and engineered design of these fixtures that are new to the lighting scene.

To learn more about Pinnacle products, or to receive more information about Pinnacle's participation in LEDucation 2019, please contact marketing@pinnacle-ltg.com, call 303-322-5570 or visit www.pinnacle-ltg.com.
