**L11-5L-1S10 PRESS RELEASE**

## LSI/CSI Launches Dimmable Flicker-Free LED Light Stick

MELVILLE, NY – LSI Computer Systems Inc. ([lsicsi.com](http://lsicsi.com)) announces the availability of a new, easy to install LED light stick solution powered by the LS9100X, our own Direct-AC Led Driver IC. Designated **L11-5L-1S10**, this light stick is capable of enhancing poorly lit regions of your home or office and requires **no bulky power supply!** It is an advanced dimmable, system-level product powered directly off the AC line.

The **L11-5L-1S10** is a complete and thoroughly integrated LED lighting solution intended for display cases/windows, work stations, under/above cabinets, closets, garages, shelves, ceilings, columns or anywhere that needs an extra burst of light in your home or business. Important features such as the LED's current limiting, thermal turn-down and voltage shutdown protection circuitry are integrated in this system guaranteeing safety and long lasting LEDs.

This all-inclusive, high quality lighting solution provides impressive performance utilizing only 5 LEDs while achieving efficacies of 100 lumens per Watt (500 lumens light output at 5W). The new **L11-5L-1S10** light stick is available in 3000K or 4000K CCT and linkable up to 25 units!

### Features and Benefits:

- Efficacies up to 100 lm/W
- +500 lumens | 5W
- > 0.97 Power Factor
- 3000K - 4000K CCT
- 30,000 + hours
- 12 ½ " length
- Linkable up to 25 units!
- Plug-in Triac Dimmer
- Patented Monolithic IC (Archimedes Series)

### Primary Applications:

- Under / Above Cabinets
- Closets
- Shelves
- Display Cases / Windows
- Ceilings
- Garages
- Store Lighting
- Bar Lighting

Custom applications are welcomed.

### ABOUT LSI/CSI

Founded in 1969, LSI/CSI began operations as the world's first fabless semiconductor company. Along with the development of fully custom and standard integrated circuits, LSI/CSI is a designer and manufacturer of standard and custom LED light engines and LED luminaries. Using the latest technology, we have been able to produce a revolution in the design of LED products without the need of bulky and expensive AC-DC power supplies. We specialize in standard and customer specific designs for industrial and residential applications.
