HessAmerica, Griven, and Nordeon to Exhibit at LEDucation

Gaffney, South Carolina – March 4, 2019

HessAmerica, Griven USA, and Nordeon USA, members of the Nordeon Group, will be exhibiting at LEDucation 2019 in New York on May 12-13, 2019. The three companies will be exhibiting at booths 321, 323, and 325 in the Grand Ballroom. Introduced in 2007, LEDucation has become the largest LED-only trade show and educational forum in the United States.

HessAmerica, recognized for premium innovative outdoor lighting products with European styling and design, will be exhibiting outdoor lighting solutions ranging from an exterior rated EXIT bollard to illuminating columns with multi-functional lighting and non-lighting solutions. Products on display include the multiple award-winning **PORTAL** illuminating column and **PORTAL EXIT** bollard, as well as **CITY ELEMENTS** modular light columns and **ARINI** pole mounted luminaires. Visit HessAmerica online at <https://www.hessamerica.com/Homepage/>.

Griven USA, a leader in color-changing and dynamic white architectural lighting instruments, will exhibit a number of products including **JASPER**, a high-power luminaire for accenting, spotlighting, or floodlighting of large-scale areas and architectural elements, **RUBY MC** inground luminaire with specialized anti-slip coating, and the **JADE** accent luminaire with new generation white LEDs. The award-winning **EKLIPSE**, a diminutive “effects” luminaire designed to illuminate the inner frames of fenestration and similar architectural elements in RGBW, dynamic white, or static white LED illumination, will also be in display. Griven USA is online at <http://www.griven-usa.com/>.

Nordeon USA, manufacturer of high-quality indoor luminaires for retail and architectural applications, will exhibit a variety of products including **Hance**, an architectural range of track spotlights which includes one of the smallest line voltage spotlights with an integral driver. Also being exhibited is **Mun Dark**, a playful range of indirect wall mounted luminaires in three diameters for the creative application of light as art; and **Baldur**, a configurable LED light line which can integrate linear modules and track luminaires on a single platform. Visit Nordeon USA online at <https://www.nordeon-usa.com/> for more information.
