AEON LED Flood Lighting
The Most Efficient LED Flood Luminaire in the Industry!

Fort Mill, SC - Introducing the most rugged and powerful LED Flood Light in the industry, the AEON LED Flood Light is specifically designed for Commercial, Industrial and Municipal applications. With an incredibly long life span of over 100,000 hours, the AEON LED Flood Luminaire is available in five different delivered lumen packages: 33,100lm, 44,100lm, 62,100lm, 73,500lm & 105,000lm, along with Multi-Voltage options: 100-277VAC and 347-480VAC.

The AEON LED Flood Light is fully enclosed, IP67 rated Luminaire that protects sensitive electronic components from any external elements. It can withstand extreme conditions and is suitable for use in corrosive environments. Using AEON Proprietary and Patented Thermal Management System, the Luminaire allows for continuous airflow, keeping critical electronic components cool. Revolutionary Patented Aerodynamic Design allows maximum wind resistance, reducing vibration and subsequent flickering of light.

With a CRI >85 and 140 Delivered Lumens per Watt, the AEON LED Flood Luminaire has the highest CRI in its class, making it the industry leader in efficacy! Precise Optics with a CRI >85 are excellent for Safety and Security of facilities.

The AEON LED Flood Luminaire maintains a UGR <19, which avoids any visual discomfort. AEON is adaptable to various wired or wireless intelligent lighting controls. AEON can also be paired with our HyLink Wireless Control for your custom needs to maximize energy savings.

Available in various NEMA Beam Spreads, the AEON LED Flood Luminaire also incorporates field changeable lenses, making it optimal for different applications. Integrated LED Drivers with Quick Connect/Disconnect System make maintenance a breeze.

AEON offers additional capabilities such as Free Photometrics, RGBW/RGBA Luminaires, Remote Drivers, Extended Warranties, and Project Financing. AEON LED Flood Luminaires are DLC Premium listed allowing for maximum rebates & incentives from participating Utility Programs and is GSA Approved for Federal Agencies.
