FOR IMMEDIATE RELEASE

Modular Lighting Instruments to Showcase New Products at LEDucation 2020
The Belgian lighting manufacturer celebrates its 40th anniversary this year

New York, NY — March 2020 — Belgium-based lighting manufacturer Modular Lighting Instruments is pleased to announce that it will be showcasing two new product families and extensions at this year’s LEDucation, which will take place March 17-18, at the New York Hilton Midtown.

Coming off the heels of an exciting year in which the European company launched several of their innovative light fixtures into the North American market, Modular Lighting Instruments will be displaying the Pista track system, Qbini (Modular’s smallest spotlight) and Smart 1.9 (the newest offering within the Smart family) at this year’s LEDucation:

- **Pista** is a versatile, 48V magnetic track rail system that offers a myriad of configurations including a Linear LED, Night Light LED, as well as the addition of five other Modular Lighting Instruments spotlight and suspended fixtures. Pista can be surface-mounted, suspended, or recessed.

- Designed by Paris-based industrial designer Florent Coirier, **Qbini** is the smallest spotlight ever produced by Modular Lighting Instruments. Deriving inspiration from the shapes of children’s sorting boxes, Qbini allows you to customize your own fixture by offering three finish options, six shapes, and four sizes.

- **Measuring just 1.9 inches in diameter and an aperture of less than 1.5 inches, Smart 1.9** can deliver up to 311 lumens per each compact fixture. With small-scale modern appeal, Smart 1.9 can be combined with a square or rectangular finishing plate to form a recessed luminaire with Smart Mask.

In 2020, Modular Lighting Instruments celebrates its 40th anniversary, and will be launching an enticing new marketing campaign that commemorates four decades in the lighting business. With luminaire offerings spanning a wide range that includes surface, recessed, suspension, and track lighting, the company’s versatile fixtures have been applied to hospitality, retail, education, office, and high-end residential settings around the world.

Visit Modular Lighting Instruments at booth **GB 1012**, in the exhibition hall to see their impressive products in person.
